

Preserving Western Civilization

Conference Information

Statement of Purpose:

Western civilization is under assault from many directions. Three such threats will be discussed at this conference. First, the massive influx to the United States and Europe of Third-World immigrants who do not share our fundamental political and cultural values. Second, the threat from Islam, a militant ideology that is hostile to our society and, in principle, committed to destroying it. Third, the persistent disappointing performance of blacks, which whites mistakenly blame on themselves. The resulting feeling of guilt that many whites have undermines Western morale and deters us from dealing sensibly with the other threats.
